Default Parameters

Population size: 100, mutation probability: 0.8, offspring count: 2, termination limit: 10000, number of runs: 100

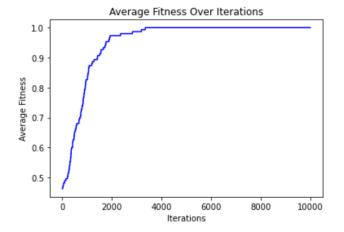

Positions: [6, 4, 2, 0, 5, 7, 1, 3]

Average time taken for each trial: 17.836043467521666 seconds

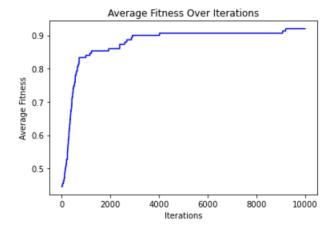

Changing mutation Probability

Increasing to 0.999

Positions: [4, 6, 1, 3, 7, 0, 2, 5]
Average time taken for each trial: 24.738975203037263 seconds

Decreasing to 0.2

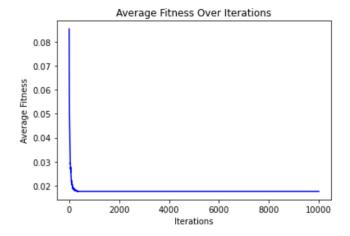

Changing offspring count

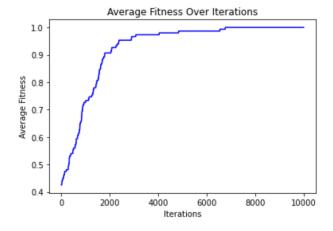

Best Solution:

Best Solution:

Increasing to 50

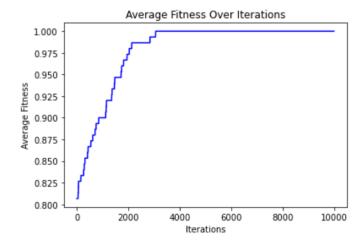

Decreasing to 1

Positions: [6, 1, 3, 0, 7, 4, 2, 5]
Average time taken for each trial: 30.76847900390625 seconds

Changing the population size

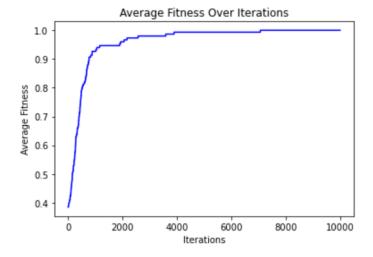

Increasing to 500
